

bamboovision

In many ways we sincerely contribute to the protection and healing of this planet.
We use our energy, talents and skills for this noble and urgent task.
It is the responsibility of every human being!

**“THAT’S ONE SMALL SIP FOR YOU,
ONE GIANT LEAF FOR HUMANKIND”**

People around the world are finally waking up and reacting to the call of climate change and plastic pollution. We all know that despite individual efforts, the greatest impact will only happen when governments and companies decide to take the leap and change to a viable alternative to single-use plastic that meets the world's demand.

BioBio Straws would love to join you at your favourite **restaurants, hotels, bars, clubs, coffee shops, resorts, events, wedding, cruise lines, festivals, concerts, stadiums and airlines...**
...and well, everywhere.
